

Week 13: Roster File

Overview

This assignment turns Week 13 concepts into a small, finishable Java program or project milestone. Start from the provided template, preserve the public class filename, and run the program in IntelliJ before submitting.

Objectives

- Traverse an array of objects.
- Write text with Files.write.
- Read text with Files.readAllLines.

Required reading - one new chapter

- [Think Java Chapter 12 - Arrays of Objects](#)

Optional supplemental reading - previously covered chapters

- [Chapter 7 - Arrays and References](#)
- [Chapter 11 - Designing Classes](#)

Interactive practice

- [Runestone: arrays of objects practice](#)

Supplemental videos

- [Arrays of objects](#)

Complete these steps

- Create Week13ClassroomRoster and a class named ClassroomRoster.
- Copy the starter into ClassroomRoster.java.
- Complete the Student constructor and getName method.
- Create Ada, Grace, and James in a Student array.
- Build an ArrayList containing the three names.
- Inside a try block, write the names to students.txt with Files.write.
- Read students.txt with Files.readAllLines and print every loaded name.
- Catch IOException and print a helpful message.
- Run and confirm students.txt is created and all three names appear.
- Submit ClassroomRoster.java and students.txt.

What will be checked

Use this list as your final review before submitting.

- Three Student objects are stored in an array.
- Files.write and Files.readAllLines are used.
- IOException is caught.

- The program creates students.txt and prints Ada, Grace, and James.
- The submitted file contains no unfinished TODO marker from the starter template.
