

Week 5: Age Group

Overview

This assignment turns Week 5 concepts into a small, finishable Java program or project milestone. Start from the provided template, preserve the public class filename, and run the program in IntelliJ before submitting.

Objectives

- Write boolean comparisons.
- Build a complete three-way decision.
- Test boundary values.

Required reading - one new chapter

- [Think Java Chapter 5 - Conditionals and Logic](#)

Optional supplemental reading - previously covered chapters

- [Chapter 3 - Input and Output](#)

Interactive practice

- [Runestone: if-statement coding practice](#)

Supplemental videos

- [If statements](#)
- [Logical operators](#)

Complete these steps

- Create Week05AgeGroup and a class named AgeGroup.
- Copy the starter into AgeGroup.java.
- Prompt for an age and read an int.
- If age is less than 13, print Child.
- Otherwise, if age is less than 20, print Teen.
- Otherwise, print Adult.
- Run with 12 and confirm Child.
- Run with 13 and 19 and confirm Teen.
- Run with 20 and confirm Adult.
- Submit AgeGroup.java.

What will be checked

Use this list as your final review before submitting.

- Scanner input and an if/else-if/else chain are used.
- Age 12 is classified as Child.
- Ages 13 and 19 are classified as Teen.
- Age 20 is classified as Adult.
- The submitted file contains no unfinished TODO marker from the starter template.
